

MICHIGAN CAN LEAD THE FUTURE OF TRANSPORTATION

Michigan built the modern automobile. We can lead its next generation.

Cleaner fuels, advanced vehicles, and innovative technologies are creating new opportunities to **strengthen Michigan's economy, create good-paying jobs, expand consumer choice, and keep our automotive industry globally competitive.**

MICHIGAN'S CLEAN TRANSPORTATION INDUSTRY BY THE NUMBERS

AUGUST 2026 DATA

31,000+

Michiganders employed in the clean vehicle industry

137,000+

EVs registered in Michigan

33,600+

Plug-in hybrid vehicles registered in Michigan

179,300+

Hybrid vehicles registered in Michigan

1 million

Michigan vehicles capable of using alternative fuel blends, including E85 and biodiesel

Nearly 6,000

Public alternative fueling sites across Michigan, including EV, E85, and propane

Michigan has the workforce, manufacturing base, consumers, and infrastructure to lead the next generation of transportation.

MICHIGAN'S CLEAN TRANSPORTATION PRIORITIES

Michigan's transportation future should be shaped by policies that **encourage innovation, expand consumer choice, strengthen domestic energy production, and keep our automotive industry globally competitive.**

01

PASS A COMPETITIVE FUELS POLICY

Create a market-based framework that rewards lower-carbon fuels and expands options for Michigan drivers and businesses.

02

LEAD WITH THE STATE FLEET

Increase the use of alternative fuels and advanced vehicles in the state fleet to create reliable demand while lowering operating costs for taxpayers.

03

PROTECT CONSUMER CHOICE

Eliminate Michigan's new, unfair EV and hybrid vehicle registration taxes and return fees to levels comparable to those paid by gasoline vehicles.

04

HARNESS GEOLOGIC HYDROGEN

Support continued exploration of Michigan's geologic hydrogen resources and their potential economic benefits.

05

INVEST IN CLEAN TRANSPORTATION

Support rebates and tax credits for producing, selling, installing, and using clean fuels and transportation technologies in Michigan.

WHY IT MATTERS

LOWER COSTS

Reduce fuel and operating costs for drivers and businesses.

ENERGY SECURITY

Keep more energy dollars in Michigan and reduce exposure to volatile global oil prices.

GOOD-PAYING JOBS

Grow Michigan's transportation workforce and create new opportunities as technologies and fuels evolve.

CONSUMER CHOICE

Give Michigan drivers access to more vehicles and fuels that fit their needs and budgets.

KEEP MICHIGAN THE AUTOMOTIVE LEADER

No matter what powers the vehicles of the future, they should be designed, built, and fueled in Michigan.
