A CLEAN FUELS AGENDA FOR MICHIGAN

Michigan's transportation future must be shaped by policies that **reduce costs, expand consumer choice, strengthen domestic energy production, and keep our automotive industry globally competitive.**

1 **PASS THE COMPETITIVE FUELS ACT**
Create a market-based framework that rewards lower-carbon fuels and expands affordable options for Michigan drivers and businesses.

2 **REFORM THE EV REGISTRATION TAX**
Bring Michigan's EV registration tax in line with gas vehicle taxes so all drivers pay their fair share.

3 **INVEST IN CLEAN TRANSPORTATION**
Support rebates and tax credits for producing, selling, installing, and using clean fuels and transportation technologies in Michigan, including Sustainable Aviation Fuel (SAF) and continued funding for the Clean Fuel and Charging Infrastructure Program to expand EV charging.

4 **LEAD ON CLEAN FLEETS**
Increase the use of alternative fuels and advanced vehicles in the state fleet, and help municipal, school, transit, and commercial fleets do the same, creating reliable demand while lowering operating costs for taxpayers and businesses.

CLEAN FUELS ARE GOOD FOR MICHIGAN

LOWER COSTS
Reduce fuel and operating costs for drivers and businesses.

ENERGY SECURITY
Keep more energy dollars in Michigan and reduce exposure to volatile global oil prices.

GOOD-PAYING JOBS
Grow Michigan's workforce and create new opportunities as technologies and fuels evolve.

CONSUMER CHOICE
Give Michigan drivers access to more vehicles and fuels that fit their needs and budgets.

EXPANDING CHOICE. DRIVING DOWN COSTS.

Clean Fuels Michigan is a nonprofit trade association bringing together **automakers, utilities, fuel providers, nonprofits, agriculture, and other industry leaders** to advance clean transportation in Michigan. We take a **technology-neutral, market-driven approach** that recognizes the role of diverse fuels and technologies in meeting the needs of Michigan families, businesses, and communities.
